Product Overview

PlayScheduler is a professional Windows scheduled playback software designed for schools, shopping malls, enterprises, and other scenarios, providing automated media playback solutions.

Core Features

- **Video Rotation**: Support for multiple video formats with automatic rotation
- **Background Music**: Scheduled background music playback
- **Full Screen Playback**: Full-screen playback mode support
- **Emergency Interrupt**: Instant content insertion for emergencies
- **Scheduled Tasks**: Flexible scheduled task settings
- **Multi-Screen Support**: Support for multiple screen displays

Application Scenarios

- Campus broadcasting systems
- School automatic bell ringing
- Shopping mall background music
- Digital signage display
- Enterprise information publishing

System Requirements

Minimum Configuration

- **Operating System**: Windows 10/11 (64-bit)
- **Processor**: Intel Core i3 or equivalent
- **Memory**: 4 GB RAM
- **Storage**: 500 MB available space
- **Display**: 1280x720 resolution

Recommended Configuration

- **Operating System**: Windows 11 (64-bit)
- **Processor**: Intel Core i5 or higher
- **Memory**: 8 GB RAM
- **Storage**: 1 GB available space
- **Display**: 1920x1080 resolution or higher

Installation & Activation

Installation Steps

1. **Download Installer**
 - Download the PlayScheduler installer from the official website
 - Filename: `PlayScheduler\_Setup\_x64.exe`
2. **Run Installer**
 - Double-click the installer file
 - Follow the installation wizard prompts
 - Choose installation location (default: `C:\Program Files (x86)\PlayScheduler`)
3. **Complete Installation**
 - A shortcut will be created on the desktop
 - Click "Finish" to exit the installation wizard

Software Activation

First Run

1. Launch PlayScheduler
2. The system provides a **3-day free trial**
3. All features are fully available during the trial period

Activation Steps

1. Click menu bar **Help** → **Enter Activation Code**
2. Enter your purchased activation code
 - Format: `PDF-XXXX-XXXX-XXXX-XXXX`
 - Or: `XXXXXXXX-XXXXXXXX-XXXXXXXX-XXXXXXXX-XXXXXXXX-XXXXXXXX`
3. Click **Activate** button
4. After successful activation, the software will display activation status

Purchase License

- Visit: <https://www.smartschedule365.com/purchase.html>
- Or purchase through the **Purchase** button in the software

Interface Overview

Main Interface Layout

...

The screenshot displays the PlayScheduler v3.0 application window. The title bar shows the application name and version. The menu bar includes File, Edit, Playback, View, Tools, and Help. The main interface is divided into several sections: a top bar with a music icon, the application name, and two buttons (Website and Date Time); a central area with a Media Player (Video Playback) and a Task Management table; a bottom-left section for Playback Control with buttons for Play, Pause, Stop, Previous, Next, and Test, along with a volume slider set to 80% and an Emergency Interrupt button; and a bottom-right section for System Info with Add, Edit, and Delete buttons.

Quick Start

Step 1: Add Media Files

1. Prepare your media files (video or audio)
2. Place files in a location accessible by the software

3. Supported formats:
- **Video**: MP4, AVI, MKV, WMV, MOV, FLV
 - **Audio**: MP3, WAV, AAC, FLAC, OGG, WMA

Step 2: Create Scheduled Tasks

1. Click **Add** button
2. Fill in task information:
 - **Task Name**: Enter task name (e.g., "Morning Exercise Music")
 - **Start Time**: Set playback start time
 - **End Time**: Set playback end time (optional)
 - **Repeat Mode**: Select daily, weekly, weekdays, etc.
 - **File Path**: Select media file to play
3. Click **Save** to save the task

Step 3: Start Scheduled Playback

1. Ensure task status is **Active**
2. Software will automatically play at scheduled time
3. Check **System Info** area for next task

Feature Details

1. Task Management

Add Task

1. Click **Add** button or menu **Edit** → **Add Task**
2. Fill in the dialog:
 - **Basic Info**: Task name, description
 - **Schedule**: Start time, end time, repeat mode
 - **Media**: Select media file
 - **Playback**: Playback mode, volume, full-screen option
 - **Advanced**: Date exclusion, interrupt settings
3. Click **Save** to save

Edit Task

1. Select the task to edit in the task list
2. Click **Edit** button or double-click the task
3. Modify relevant information
4. Click **Save** to save

Delete Task

1. Select the task to delete in the task list
2. Click **Delete** button
3. Confirm deletion

Task Filtering

- **Search Box**: Search by task name
- **Status Filter**: All, Active, Paused
- **Type Filter**: All, Audio, Video

2. Playback Control

Basic Controls

Button	Function
----- -----	
▶ Play	Play current media
⏸ Pause	Pause playback
⏹ Stop	Stop playback
⏮ Previous	Previous file
⏭ Next	Next file
🎛 Test	Test playback (doesn't affect scheduled tasks)

Volume Control

- Drag volume slider to adjust (0-100%)
- Click  icon to mute/unmute

Full-Screen Playback

- Check ****Fullscreen Playback**** option
- Or double-click video area to enter full-screen
- Press ****ESC**** to exit full-screen

3. Emergency Interrupt

Using Emergency Interrupt

1. Click the red ****🚨 Emergency Interrupt**** button
2. Select interrupt type:
 - ****Audio****: Play audio file
 - ****Video****: Play video file
 - ****Text****: Display text message
3. Select or enter interrupt content
4. Click ****Start Interrupt**** to begin interrupt
5. Click ****Stop Interrupt**** to end interrupt and resume normal playback

Interrupt Settings

- ****Interrupt Duration****: Set interrupt duration
- ****Fade In/Out****: Set fade in/out effects
- ****Volume****: Set interrupt volume

4. Playback Modes

Sequential

- Play in list order one by one
- Suitable for: News broadcasts, course playback

Loop

- Single loop or list loop
- Suitable for: Background music, promotional displays

Random

- Random order playback
- Suitable for: Music playback, casual scenes

5. Repeat Modes

Mode	Description
----- -----	----- -----
Once	Execute only once
Every Day	Repeat daily
Weekdays	Repeat on weekdays (Mon-Fri)
Weekends	Repeat on weekends (Sat, Sun)
Weekly	Repeat weekly
Custom	Custom repeat rules

6. Date Exclusion

Set Exclusion Dates

1. In task edit dialog, click ****Date Exclusion**** tab
2. Click ****Add Exclusion**** to add exclusion date
3. Select exclusion type:
 - ****Single Date****: Specific date
 - ****Date Range****: Date range
 - ****Weekly****: Certain days each week
 - ****Monthly****: Certain days each month
4. Set exclusion reason (optional)
5. Click ****Save**** to save

Common Exclusion Scenarios

- Holidays
- Exam weeks
- Special event days
- Maintenance days

Advanced Features

1. Multi-Screen Support

Configure Multi-Screen

1. Menu **Tools** → **Settings**
2. Select **Display** tab
3. Check **Enable Multi-Screen**
4. Select target screen
5. Click **Apply** to apply settings

Screen Modes

- **Primary**: Play on main screen
- **Secondary**: Play on secondary screen
- **Extended**: Extended mode
- **Duplicate**: Duplicate mode

2. Streaming Playback

Add Streaming Task

1. In task edit dialog
2. Select **Media Type** as **Stream**
3. Enter streaming URL
 - Supports RTMP, RTSP, HTTP, HTTPS protocols
 - Example: ``rtmp://example.com/live/stream``
4. Set buffer time
5. Click **Test** to test connection
6. Save task

3. Import & Export

Export Tasks

1. Menu **File** → **Export Tasks**
2. Select export format:
 - **JSON**: Complete task data
 - **CSV**: Table format
 - **XML**: Universal format
3. Select save location
4. Click **Export**

Import Tasks

1. Menu **File** → **Import Tasks**
2. Select import file
3. Select import mode:
 - **Replace**: Replace existing tasks
 - **Merge**: Merge with existing tasks
 - **Append**: Add to end
4. Click **Import**

4. Theme Settings

Switch Theme

1. Menu **View** → **Theme**
2. Select theme:
 - **Light**: Light theme

- **Dark**: Dark theme
- **Modern**: Modern theme (default)
- **Classic**: Classic theme

Custom Theme

1. Menu **Tools** → **Settings**
2. Select **Appearance** tab
3. Customize:
 - Primary color
 - Accent color
 - Font size
 - Interface layout

5. Log Viewing

View Playback Logs

1. Menu **Tools** → **View Logs**
2. View playback history:
 - Playback time
 - Played file
 - Playback duration
 - Playback status

Export Logs

1. Click **Export** in log window
2. Select export format and location
3. Click **Save**

Troubleshooting

Common Issues & Solutions

Issue 1: Software Won't Start

Possible Causes:

- Missing required runtime libraries
- Insufficient permissions

Solutions:

1. Run software as administrator
2. Install Visual C++ Redistributable
3. Check if antivirus is blocking

Issue 2: Video Won't Play

Possible Causes:

- Missing video decoder
- Unsupported file format
- File corruption

Solutions:

1. Install VLC media player
2. Convert video format to MP4
3. Check file integrity

Issue 3: Scheduled Tasks Not Executing

Possible Causes:

- Task status is Inactive
- Incorrect system time
- Software not running

Solutions:

1. Check if task status is Active
2. Calibrate system time

3. Ensure software is running in background

Issue 4: No Audio

Possible Causes:

- Volume set to 0
- Audio device not connected
- Audio driver issues

Solutions:

1. Check software volume settings
2. Check system volume settings
3. Check audio device connection
4. Update audio driver

Issue 5: Full-Screen Playback Issues

Possible Causes:

- Graphics driver issues
- Resolution mismatch
- Other software conflicts

Solutions:

1. Update graphics driver
2. Adjust screen resolution
3. Close other full-screen software

FAQ

Q1: What happens after the trial period ends?

****A**:** After the trial period ends, the software will stop working. You need to purchase a license and activate to continue using.

Q2: Can I use it on multiple computers?

****A**:** Each license can only be used on one computer. For multiple computers, please purchase the corresponding number of licenses.

Q3: How do I transfer the license to a new computer?

****A**:**

1. On old computer: Help → Deactivate to deactivate the license
2. On new computer: Help → Enter Activation Code, enter activation code to activate

Q4: What video formats are supported?

****A**:** Supports MP4, AVI, MKV, WMV, MOV, FLV and other mainstream formats. MP4 is recommended for best compatibility.

Q5: Can multiple tasks play simultaneously?

****A**:** Simultaneous playback of multiple tasks is not supported. When a new task starts, it will automatically stop the currently playing task.

Q6: How do I backup task data?

****A**:** Use File → Export Tasks feature to export all tasks and save to a secure location.

Q7: Will the software update automatically?

****A**:** The software will check for updates and prompt, but won't install automatically. You can choose whether to update.

Q8: Does it support files on network storage?

****A**:** Yes. You can use UNC paths (e.g., `\\server\share\file.mp4`) or mapped network drives.

Q9: How do I set up auto-start on boot?

****A**:**

1. Create software shortcut
2. Copy shortcut to startup folder: `Win+R` type `shell:startup`
3. Or check ****Start with Windows**** in software settings

Q10: What if I encounter other issues?

****A**:**

- View help documentation: Help → User Manual
- Visit support website: <https://www.smartschedule365.com/support.html>
- Contact support: getpdfusion7300@gmail.com
